

NSF-FUNDED RESEARCH PROJECT

iPACERS

**Interdisciplinary Program of
Advancing Climate Extreme
Resilience in Soybean**

Join an Exciting, Interdisciplinary Research Experience!

We are recruiting 4 student interns for Summer 2026 to work on an NSF-funded research project alongside faculty and graduate students.

This project brings together multiple disciplines to address real-world challenges related to agricultural resilience, with a focus on the tolerance of soybean systems to heat and drought stress.

What You'll Do

- Work closely with faculty mentors and graduate researchers.
- Contribute to an active, federally funded research project.
- Gain hands-on experience in interdisciplinary research.
- Build skills valuable for graduate school and research careers.

Program Benefits

- Lodging provided
(on-campus dorms)
- Food expenses covered
(up to \$1,600)
- \$2,500 stipend upon successful completion of the internship

Who Should Apply

Motivated students (minimum age of 18) interested in research, agriculture, remote sensing, and agricultural technologies are encouraged to apply.

Interested?

Please submit the following:

- Resume
- Transcript
- Letter of recommendation from a former teacher/professor
- Statement of purpose
(describing your interest in research, experience to date (if applicable), what you expect to gain from this internship and future plans).

Applications should be emailed to mltagert@abe.msstate.edu by April 1, 2026.

**Don't miss this opportunity to be
part of an NSF-funded research
team and make an impact!**
